## ANACOSTIA.

William White, a former resident of Anacostia, will spend the holidays with his parents, who reside on W street. Miss Veryl Watson of Maple View place is at her home for the holidays from college at Petersburg, Va. Mr. and Mrs. Robert Yowell of 1340 W street have gone to Richmond, Va. to visit relatives. John F. Earnshaw is at his home in Maple View place after a trip through Virginia. Anacostia Tent, No. 7, Knights of the Macabees, met last evening in the Masonic Hall. The tent has decided to provide the necessities of life for the widows and children of its deceased members, as has been the custom in former years, and reports submitted last evening showed that much along this line had been accomplished.

Rev. Charles Sontag, rector of the Episcopal Memorial chapel at Congress Heights, will conduct the service this morning in Emmanuel Episcopal Church, 1010 E. W. G. Davenport, rector of the latter church, will be in charge at Congress Heights.

## LARGER SALES COMPLETED.

## Oysters in Market Ample to Meet the Demands.

The sale of oysters in the shell in large lots for the Christmas trade is over, and yesterday the small buyers took possession of the wharf to get a half bushel or so stacked for the dinner and festive special occasions along the Christmas trudge.

There are plenty of oysters at the wharf, enough, the dealers say, to last several days, as it was estimated that there were about 10,000 bushels of oysters in the wharf last night fully 5,000 bushels. They said yesterday in small lots at prices ranging from 50 cents per bushel up to about 75 cents per bushel. While the number of small buyers on the wharf yesterday was not so large as it was on the day before, the dealers say that they will have to keep their oyster supply up to the care of all who will want their services.

The oysters from the Potomac river bed are on sale from the wharf, and are good and fat and shuck about a gallon to the bushel.

## WASHINGTON GIRLS CHOSEN.

## Misses Hilles and Richardson Sponsors for Revenue Cutters.

Arrangements for the launching of the new revenue cutters, Unalga and Miami, which will take place at Newport News, Va., January 27, have practically been completed. It was announced by the United States revenue cutter yesterday. Two young ladies well known to Washington society will be the sponsors. They are Miss Elizabeth Hilles, daughter of the secretary of the United States revenue cutter, and Miss Barnes Richardson, daughter of Representative Richardson of Alabama. The launch will break the bottle on the bow of the Miami.

## REPAIRS FOR MACALESTER.

## Steamer Withdrawn From Service for Annual Overhauling.

The steamer Charles Macalester was yesterday afternoon withdrawn from service on the route between this city and Mount Vernon and Marshall Hall, and has been placed out of commission for two months to receive an annual overhauling in preparation for the excursion season of next year. While laid up the boilers and machinery of the steamer will be put in thorough order, and her saloons will be refitted and painted, so that when she returns to service she will be in first-class condition. The steamer is expected to resume her trips February 22 next.

The river line freight steamers also are taking advantage of the dull season between this time and March to lay up for repair work. The steamer Trenton, belonging to the Trenton Packet Company of this city, was hauled off her route between this city and Washington, and is being overhauled and repaired at the yard of the company.

The steamer Capital City of the Potomac and Chesapeake Steamship Company, which was withdrawn from the Norfolk route Wednesday next, and the steamer City of Millford, which is being overhauled and repaired at the yard of the company, will be thoroughly overhauled and made ready to return to the route early in the spring.

## Red Rough Hands.

Made Soft and White

By

## Cuticura Soap and Ointment

For red, rough, chapped and bleeding hands, itching, burning palms, and painful finger ends, with shapeless nails, a one-night Cuticura treatment works wonders. Directions: Soak the hands on retiring in hot water and Cuticura Soap. Dry, anoint with Cuticura Ointment and wear soft bandages or old, loose gloves during the night.

Although Cuticura Soap and Ointment are sold by druggists, and dealers everywhere, a postal to "Cuticura," Dept. 120, Boston, Mass., will secure liberal sample of each, with 32-p. book on the skin.

## "FLOODS" FOR NEWSIES

Their Christmas Dinner Will Be Best Market Affords.

## TO HEAR PLAN FOR HOME

Rev. Zed H. Copp Will Explain Project After Feast.

## MAKES FOR MANLIER MEN

Success of Ventures in Other Cities Cited as Desirability of One in Washington.

Here's what has been ordered for the Christmas dinner that will be given the newsboys of the city tomorrow afternoon: 200 pounds of Vermont turkey, a crate of cranberries, a crate of celery, ninety pounds of jelly, 300 pounds of potato salad, 150 pumpkin pies, twenty pounds of cocoa, which will be made into hot chocolate, and four crates of potatoes.

The decoration scheme has been elaborated. Several Washingtonians have become interested in the newsboys, which is being decorated by the men of the Central Union Mission, in the auditorium, in which the dinner is to be held. During the dinner Rev. Zed H. Copp, whose efforts made it possible, will make several announcements to the boys.

## Home for Newsboys.

Rev. Zed H. Copp is at the present time trying to obtain funds to build in Washington a newsboys' home and clubhouse. Many persons living in Washington are interested, among them being Mrs. John Hays Hammond and Miss Mabel Boardman. Mr. Copp will tell the boys of the plan to see what they think of it. In many cities of the middle west and a few in the east, homes for newsboys have been established. In St. Paul a large building which will be used for this purpose has been completed. Within the building is a gymnasium, a school and a complaint bureau, where the newsboys can come with their tales of woe and difficulties to have them straightened out. It is this kind of a building that Mr. Copp is trying to get for Washington.

After the first of the year Mr. Copp will establish an office, he said yesterday, where newsboys may go for advice and the settlement of any difficulties they may have. In explaining this scheme, Mr. Copp said:

"Some newsboys live in places that are not the most healthy in the city. Landlords of such establishments are very independent, and when asked to remedy the defects usually tell their tenants to take the house or rooms as they find them or vacate. I, and the people with me, believe that by taking care of the newsboys we will get healthy, intelligent men, and in Washington there are more boys engaged in selling newspapers than in any other pursuit. Therefore we should look after them and see to it that they are properly cared for."

"Now, after this office is established a newsboy can come in and complain about his home, and the newsboys will see the proper authorities and have the complaint looked into. This is a scheme that has been tried in other cities, and many of the larger cities of the country. The whole idea works out along the lines of the Boy Scout movement."

"I'll talk to the boys about this after Christmas, and if they like the plan I'll go ahead with it."

The newsboys are not news vendors, as are the best that could be purchased in the local markets. Of course, the pumpkins have been bought, and the pumpkins and pumpkins are being bought, and the pies will be baked tomorrow morning in a local bakery.

## WOULD AVERT DUPLICATION.

## Commission Appointed to Consider Work of Two Bureaus.

President Taft has appointed a commission consisting of Brig. Gen. Crozier, chief of ordnance of the War Department; Director Root of the bureau of engraving and printing; and Mr. Putnam of the light-house board, to investigate an alleged duplication of work by the hydrographic office of the Navy Department and the weather bureau of the Department of Agriculture. The commission is to look into the question of the duplication of work by the two bureaus, so as to avoid duplication of work, and to see if the work of the two bureaus can be combined, and if so, how it can be done.

## MARINE RAILWAY REPAIRED.

## Big Cradle at Alexandria Shipyard to Be Placed in Commission.

The work of rebuilding the big marine railway at the Alexandria shipyard, which broke down about two weeks ago as the steamer Queen Anne was being hauled out for inspection of hull under water, is practically completed and will be placed in commission this week. The new cradle, which has been strengthened to prevent a repetition of the accident, which fortunately did no damage.

The marine railways at Bennett's boat yard, off of 11th street southwest, are being improved and made available for the hauling out of heavy tanks, lighters and other vessels. The windlass with which the larger railway is hauled has been so rigged that additional horses can be hitched to it when vessels of the class of the army steamer Pontiac are to be hauled. The cradle of the railway also has been strengthened and strengthened in preparation for hauling out vessels for repair work in the winter when they are berthed.

## Wife Asks Absolute Divorce.

Mrs. Helen M. G. Bonner has filed suit in the District Supreme Court for an absolute divorce from William T. Bonner. The suit is based on statutory grounds. They were married in Princeton, Mass., September 2, 1908. There are no children. Eugene A. Jones is the wife's attorney.

## Lincoln Camp Entertainment.

A musical entertainment was given by Lincoln Camp, Sons of Veterans, Friday night at the hall, 410 10th street northwest. Among those who took part were George C. Fugitt, Messrs. Louis and F. J. Spencer, Miss Reynolds, Master Joseph Spencer, Miss Gladys Barrow and W. E. Garlick.

## MARINE PROPERTY SOLD.

## Transfers Recorded in the Custom House at Baltimore.

Sales of vessel property made in the past week were recorded in the custom house at Baltimore, as follows: Schooner Stephen Chase, ten tons, from Philip G. Price to Edward T. Howard, \$180. One-half of powerboat Emma K. Reed, fifty tons, from Mary W. Woodall and Robert C. Morgan, administrators, to Adelle M. Rignin and Norman L. Rignin, \$5. One-third of schooner Emma T. Faulkner, fifty tons, from Margaret L. Rice, executrix, to Margaret L. Rice, \$1.

## River Men and Others.

Lieut. Russell Dean of the harbor precinct, who has been on leave of absence for several days, has returned to duty, relieving Sgt. Janie Passano, who was acting lieutenant in his absence. Capt. Andrew Kendrick, master of the schooner Maud S., who was in this city on a visit, has returned to his home in Baltimore. Capt. Frank Taylor is at Providence, R. I., looking after the business interests of the Taylor tug advance, which is in service there. Capt. Frank Posey, master of the tugboat "Trenton," has gone to Charles county, Md., to spend a week or ten days while his vessel is being overhauled at this city.

## Death of Richard A. Claggett.

Richard A. Claggett, a lifelong citizen of Montgomery county and for many years one of Rockville's most respected residents, died this afternoon, aged seventy-five years. He had been ill a long time of an affection of the heart and other troubles and his death was not unexpected. Surviving him are his wife and the following children: Miss Rose Claggett, Mrs. Jacob R. Umstead, Charles A. and Joseph L. Claggett and Mrs. Carey Kingston, all of Rockville. The funeral will take place at 9 o'clock Tuesday morning from St. Mary's Catholic Church.

## ECONOMY

Subject to Be Discussed at Coming Convention.

## OPENS HERE WEDNESDAY

American Home Economics Association Plans Big Gathering.

TO CONSIDER SMALL PROBLEMS

More Than 800 Delegates Expected to Attend—Papers on Popular and Technical Subjects.

More than 800 delegates are expected to attend the fourth annual convention of the American Home Economics Association, which opens in this city next Wednesday, closing on the following Saturday. The sessions of the convention will be held at the Henry D. Cooke School, near 17th street and Columbia road. A meeting of the executive committee will be held Wednesday afternoon at the Hotel Gordon, official headquarters, and daily sessions at 9:30 a.m., 1:30 and 5:30 p.m. will be held at the school building Thursday, Friday and Saturday.

The American Home Economics Association, as might be judged from its title, deals with the various economic problems within the home. No phase of the many-sided problems of foods and their preparation is so insignificant or so big as to escape attention. The chemistry of food and the chemical changes which take place during cooking, as well as those which occur within the digestive tract after the food has been consumed, form a large part of the practical scientific work of the association's investigators and teachers. The proper foods and proper methods of feeding babies and young children are another feature of the instructive work; while an entire session, that of Friday morning, will be devoted to a discussion of the general topic, "After some years of experimentation, what is the educational aim of the home economist in college courses in domestic art?"

## Program of Papers.

Following the reading of reports of the officers and the business session of the session Thursday, a program of papers and discussion will be presented. The opening paper will be on "Applied Science—Its Place in the Curriculum of a College of Liberal Arts for Women." This paper is divided into two sections, part 1, on "Bio-chemistry," being handled by Mary Louise Foster, instructor in chemistry at Smith College, and part 2, "Chemistry," being presented by Miss Katharine Blunt, Ph.D., assistant professor of chemistry atassar. "Metabolism Experiments," the title of a paper by Alice P. Blood, assistant professor of chemistry, Simmons College, will be presented at 10:30 a.m. on Thursday.

The closing paper will be a "round table" on the elementary work in preparation of food in college classes, the discussion of which will be handled by Miss Abby L. Martin of the University of Wisconsin. Preceding this, Prof. E. V. McCollum of the University of Wisconsin will read a paper on "Some important considerations in the feeding of young children."

At 9:30 o'clock Friday morning the Home Economics Association of Washington will receive the delegates at the Cooke School, Supt. Davidson of the Washington schools addressing the members.

At sessions except those strictly devoted to the business of the association will be open to the general public, and an urgent invitation is extended to all women of Washington—the men as well as women.

The association was founded by the late Mrs. Ellen H. B. Smith, who was a member of the National Institute of Home Economics, and who was a member of the National Institute of Home Economics, and who was a member of the National Institute of Home Economics.

## WORK SOON TO BEGIN.

## Excavation Necessary for Bureau of Engraving and Printing Building.

Preparations are being made by Sanford & Brooks of Baltimore to start the excavating work necessary for the new bureau of engraving and printing building in the latter part of this week, or early next week. The digging will commence on a big steel shovel, which is to be used in the railway yards at the foot of 14th street a year or two ago has been moved across 14th street to the site of the new building. The work on this machine is in position digging will start.

A high board fence has been built about the ground which the big government money printing house is to occupy, and visitors will be allowed while it is building. To facilitate the moving of the money printing house, the new building will be taken out of the foundations a pier is being built on the Potomac Park side of the harbor, which will be ready for use this week. The steam shovel will load the excavated material on wagons which will take it to the new pier and dump it into a scow to be taken to the dumping grounds on the river and deposited.

To facilitate loading the wharf has been constructed so that a scow can pass under it, and the cars dump their loads directly aboard, no shoveling being necessary.

## DIGGING IN THE ANACOSTIA.

## Dredge Pittsburgh Has Taken Out Nearly 2,000,000 Cubic Yards.

The big dredge Pittsburgh, which is working on the improvements on the Anacostia river, is now on the last section of its work, which, it is said, will be completed within the next two weeks. Since starting operations on the Anacostia river the dredge Pittsburgh has taken from the channel between the Potomac and Anacostia rivers nearly 2,000,000 cubic yards of material, which has been pumped upon the part of the flats near Giesboro point, which is to be reclaimed and made into a new city park. The dredge has been carrying out large vessels that go to the navy yard, have been repaired or made less sharp, and twenty feet of water can be carried from the Potomac channel to the navy yard. The dredge has been carrying out large vessels that go to the navy yard, have been repaired or made less sharp, and twenty feet of water can be carried from the Potomac channel to the navy yard.
